INSURANCE - BOILERS - ST. LOUIS PARK

We reported to Hartford Steam Boiler Inspection & Insurance Company the explosion which occurred in Lindenhausen Riley W.T. Boiler No. 4, E&B No. 73391, on December 23, 1969. Hartford acknowledges that this is a loss which would come under the terms of the policy. They believe, however, that the direct damage was less than the \$5,000.00 deductible and that there was no loss of production because the boiler was shut down on December 25 and 26, both of which were holidays. The boiler was returned to service on December 26.

Is this correct?

Very truly yours,

R. J. Doyle
